

The 5th SJTU-KTH Summer School of
Biomedical Engineering
Aug 21-27, Shanghai

Now for application!

The SJTU-KTH joint summer school of biomedical engineering started in 2012 annually, taking place either in Shanghai or Stockholm. This year's joint summer school will be from Aug 21 to Aug 26, 2016 in Shanghai Jiao Tong University.

Different from previous SJTU-KTH joint summer schools, in this year, the students will be grouped with 4 or 5 students in each, jointly working on an assigned project, which is prepared before the start of the week. The summer school week will start with a brief orientation, followed by four full days of laboratory group work. And in the final day, each group will present a draft of their project reports, with final delivery one month later.

Student participants will be allotted to different projects. These projects will be successively presented at the web pages of both the School of Biomedical Engineering of SJTU and life science platform of KTH. An application for participation should include the prioritized preferences by the students.

SJTU will cover the local accommodations (food and hotels) during the summer school for all KTH students and faculty members. KTH will give a contribution towards travel costs for PhD students.

We encourage the **graduate students and senior undergraduates in biomedical engineering, or those who are interested in the SJTU-KTH dual MSc/Ph.D. biomedical engineering programs** to apply for the SJTU-KTH summer school. For any questions, please contact the summer school directors or secretary (see the contact in end of this announcement). Please submit **your CV** and a **reference letter** from your supervisor to Ms. Hilary Shang (shangli@sjtu.edu.cn) before May 31st, 2016.

Directors:

SJTU: Shanbao Tong, Ph.D. Professor (stong@sjtu.edu.cn)

KTH: Anders Eriksson, Ph.D. Professor (anderi@kth.se)

Secretary: Hilary Shang (shangli@sjtu.edu.cn)

Important Dates:

May 16: Open for application

May 31st: Deadline for Application

June 5th : Admission results

June 12th : Announcement of the projects

June 30th : Project Assignment

July 1st –Aug 20th : Project preparation and communication with the supervisor(s)

Aug 21st : Registration; Orientation and Welcome Reception

Aug 22-25: working in the supervisor' s laboratory

Aug 26: lab tour and draft project report presentations

Aug 27: social events

Aug 28: Closure

Sep 30: Delivery of final reports.
